CONUS · black with black interior
The conical form of the cooker hood captures and extracts the steam.

In 2009 Trepol began an exciting product development process with the VE2 design studio. This ongoing co-operation ensures that our products will have an up-to-date design that fulfills the needs and wishes of modern and quality-conscious consumers now and in the future.

The CONUS series is based on a modern interpretation of the iconic classic cooker hood – the pointed model from the 1970s – which derives from the smoke hood over a traditional forge. The simplicity of its conical geometric form reflects classical Danish design and a timeless style.

Trepol's reputed and patented filter system has been pivotal in the design of the CONUS series. Its conical form reinforces the suction action, effectively covering the cooking area. Conus is user-friendly and easy to clean – no sharp corners.

The inner parabola incorporates the filter and makes a neat transition with the outer form whilst efficiently capturing and extracting the steam.

An intuitive control panel is beautifully integrated in the conic form which makes the control panel easily accessible and easy to clean.

CONUS 01 - black with white interior

A beautiful object in the modern kitchen where the emphasis is on the room as a meeting point for the whole family where children, grown-ups and guests live out their daily lives.

It was an important parameter in the design process for the cooker hood to be a distinctive element in the kitchen's interior design.

Our aim has been to give the cooker hood a less technical expression without compromising functionality. Conus is an aesthetically pleasing object in its own right.

- designer Hugo Dines Schmidt, VE2

CONUS · 01

Ceiling mounted [model 81]

ø: 440mm · h: 800-1100mm
Colors: black/white

Launch: October 2011
RRP without VAT: 2.685 Euro/€

CONUS · 02

Wall mounted [model 82]

ø: 440mm · h: 400mm · d: 520mm
Colors: black/white

Launch: August/September 2012
RRP without VAT: 2.685 Euro/€

CONUS · 03

Wall mounted [model 80]

ø: 440mm · h: 150mm · d: 520mm
Colors: black/white

Launch: March/April 2012
RRP without VAT: 2.255 Euro/€

Trepol cooker hoods are unique in several ways. First of all they are not mass-produced but are manufactured in small series by skilled craftsmen who aspire to the highest standards of workmanship. Quality is all-important, from the moulding, bending, welding and polishing of the metal to the assembling and packaging.

At Trepol you can tailor your cooker hood to fit your individual wishes and needs. Our customized solutions are produced in our own workshop by skilled craftsmen who work conscientiously with the materials and never compromise on functionalism and finish.

Trepol is Danish design, production and quality from start to finish. That is why we are the only suppliers on the market to give 2+3 years of warranty.

The CONUS series comes with an external motor
- the above prices are without the motor
